

Our Company and Ethical Focus

We are software development outsourcing company focusing on IT consulting and offshore programming services with team having years of experience in mobile and web application development, delivering state of the art computer software solution. Our professional team has in-depth expertise in Java, PHP, .Net, Open Source as well as profound knowledge of iOS, and Android. Technology Bench tech-savvy specialists have successfully delivered many web and mobile projects to our valuable customers and partners.

We offer full-cycle development services from business analysis, software design and from prototyping to development, QA services, post-project maintenance and support. We serve from strategy consulting to software solutions and implementing project development plans for our customers. We offer a range of expertise aimed at helping customers re-engineer and re-invent their businesses to compete successfully in an ever-changing marketplace.

Our Mission

It is our mission is to instrument customer's businesses stronger by providing rich technology competencies, domain core expertise, and quality work of our software professionals. For providing cutting edge solution with corporate vision is to be a one-stop software partner for our global clients while maintaining an open-minded, dynamic, and customer-centric approach.

Our Approach

Our approach is based on the principle to provide effective design, a solution to a business problem. Fundamental design solution is communication - to inform, to prompt, change a perception, but this always start by engaging the viewers/customer. To overcome today's imports issues of concern i.e. competitive marketplace, rising costs of software development and lack of skilled software professionals' etc, offshore software development has emerged to be a very viable substitute.

Key Services:

- Test Development and Optimization
- Test Execution and Reporting
- Test Automation
- Functional Testing
- Non-Functional Testing

Methodology

The cornerstone of Technology Bench development methodology is the following set of agile practices that we apply to our development projects.

Approach

Design

Planning that lays the basis for making of every innovative system.

Develop

Bringing intelligent systems to life through the use of technology.

Deploy

Launching and providing effective post deployment analytics.

Our Team

We have a professional and dedicated team who work in harmony and synergy with each other. The Technology Bench Team does not consist of employees. It is the Technology Bench Members who comprise the Technology Bench Team. The Members are different from employees, in that they own the organization. They know that Technology Bench is for them and they are for Technology Bench.
