About Us

OUR COMPANY AND ETHICAL FOCUS

Technology Bench is a software development outsourcing company focusing on IT consulting and offshore programming services with team having years of experience in embedded, mobile and web application development and delivering state of the art computer software solution. Technology Bench tech-savvy specialists have successfully delivered many web and mobile projects to our valuable customers and partners.

Our company offers full-cycle development services from business analysis, software design and prototyping to development, QA services, post-project maintenance and support. We serve from strategy consulting to software solutions and implementing project development plans for our customers. We offers a range of expertise aimed at helping customers re-engineer and re-invent their businesses to compete successfully in an ever-changing marketplace.

OUR APPROACH

Our approach is based on the principle to provide effective design, a solution to a business problem. Fundamental design solution is communication - to inform, to prompt, change a perception etc, but this always start by engaging the viewers/customer. To overcome today's imports issues of concern i.e. competitive marketplace, rising costs of software development and lack of skilled software professionals' etc, offshore software development has emerged to be a very viable substitute.

OUR MISSION

Our mission is to instrument our customer's businesses stronger by providing rich technology competencies, domain core expertise, and quality work of our software professionals. For providing cutting edge solution with corporate vision is to be a one-stop software partner for our global clients while maintaining an open-minded, dynamic, and customer-centric approach.

Our Services

CLOUD

Strategic consulting and development for leading cloud services such as Amazon, Azure and Google Apps.

WEB APPLICATIONS DEVELOPMENT

Rich web applications leveraging open source and tightly integrated across a wide range of social media and enterprise applications. The core area and sole expertise of our team are in Programming and Support for all Major Platforms such as Java, Embedded, C++, .Net, Angular, Node, PHP, iOS, Android and Major Apache Stack.

MOBILE DEVELOPMENT

Not sure which solution is right for you? We are experts in cross platform, mobile web and native apps. Bridging the gap between innovative, cutting edge solutions and expenditure on Mobile apps creation with high quality and up standard.

EMBEDDED SYSTEMS

Technology Bench has a designated team for embedded system designs and solutions. We design, integrate and embed latest technologies in systems to provide state of the art solutions to our clients. We use IP (Intellectual Property) architecture for latest embedded controllers designed by various manufacturers.

INTERNET OF THINGS (IOT)

Unlock a new world of possibilities by using your Smartphone to communicate with the things around you. It's not just about connecting, it's about improving-our way of life, the way we do business, and the impact we have on our environment. It's called "The Internet of Things", and it's changing everything. Our team of IoT and embedded solutions have sound experience delivering state of the art IoT solutions.

CONTENT MANAGEMENT SYSTEM

Our content management system (CMS) solutions have easy updates, bring value to your website, are simple to use and drive business goals online. We uses one of today's most popular and easy to use content management systems (CMS) to give you the power to add and edit text, photos, and pages without even touching a line of code.

Along with primary marketing activities, we facilitate our customers with content marketing, videos required for marketing and graphic designing as well.

Our Team

The Technology Bench is a highly professional and dedicated team that works together in perfect harmony and synergy. Each member of the team brings their unique skills and expertise to the table, creating a dynamic and collaborative environment. However, it's important to note that the Technology Bench Team is not comprised of traditional employees.

Rather, the Technology Bench Team is made up of individuals who are referred to as "Technology Bench Members." These members are distinct from regular employees in that they have a vested interest in the organization. They are not just working for the company; they actually own it.

This ownership mindset sets the Technology Bench Members apart. They have a deep sense of commitment and responsibility towards the organization. They understand that Technology Bench exists for their benefit and success, and they, in turn, are fully dedicated to the growth and prosperity of the company.

This unique structure fosters a strong sense of ownership and accountability among the Technology Bench Members. They are not just working for a paycheck; they are actively invested in the long-term success and sustainability of the organization. This mindset drives them to go above and beyond in their work, constantly striving for excellence.

Overall, the Technology Bench Team is a cohesive and driven group, united by their shared ownership and dedication to the organization. Their commitment and passion contribute to the continued growth and success of Technology Bench.
